

Hello my name is Aisha Davis

I am here today to urge the General Assembly to pass a state education funding formula that is fair and equitable for all students – no matter who they are, where they live or what type of public school they go to.

My niece goes to Waterville and my nephew goes to Bridgeport learning center. My nephew also when to Barnum and he was having a difficult time there so my sister decided to move him to Bridgeport Learning Center where now he is excelling in his work. Both of them are intelligent and bright students. I have seen them grow into great people. And want that for all children to be the best students possible with that being said 4,000 dollars taken from my nephew because my sister decided to go to a different public school is so not fair at all.

As parents you have the obligation to make sure that you provide your child(ren) with the best possible education. I'm asking you to stand up for me or my niece and nephew and fix this broken funding system.
